Dayananda Sagar College of Engineering

Shavige Malleshwara Hills, Kumaraswamy Layout, Bangalore -560111

(An Autonomous Institute Affiliated to VTU Approved by AICTE & ISO 9001:2015 Certified
Accredited byNational Assessment & Accreditation Council (NAAC) with 'A' Grade)

E-LEARNING MANAGEMENT SYSTEM

A Mini Project Report on Web Technology

Submitted in partial fulfillment of the requirements for the Award of MCA degree

Master of Computer Applications
Submitted to
Dayananda Sagar College of Engineering

Supervised by
Dr. CHANDRIKA M

Submitted by

Ashwin M Nayak(1DS21MC024)

CERTIFICATE

`

I hereby certify that the work which is being presented in the MCA, mini project report entitled '**E-LEARNING MANAGEMENT SYSTEM',** in partial fulfillment of the requirements for the award of the MCA and submitted to the **Department of MCA, Dayananda Sagar College of Engineering, Bangalore** is an authentic record of our my work carried out during the period of Oct-2022 (II Semester) under the supervision of **Dr. Chandrika M, Department of MCA.**

The matter presented in this project report has not submitted by me for the award of any other degree elsewhere.

Signature of Student(s)

This is to certify that the above statement made by the students is correct to the best of my knowledge

Signature of Supervisor   **Signature of HOD**

Introduction

E-Learning is an alternative to a traditional classroom learning experience and is often referred to as "online learning," "remote learning," "virtual learning," "mobile learning," "digital learning," or "distance education."

E-Learning Management System, as described above, can lead to error free, secure, reliable and fast management system. It can assist the user to concentrate on their other activities rather to concentrate on the record keeping.

Project modules

Home Module: In the home module, it gives detailed information about what the application is all about. Here users can view the main header of the page, which gives links to other modules. For the user, it gives the registering option. Show the popular courses on the E-learn web page. The user can view the student feedback and also share his feedback.

Login Module: The Login module helps the user to login to their account. A user must register with the system to avail the services and access the information. A user can register by giving the needed credentials and, after the registration   user needs to login to his account.

Services Module: Used for managing the details of course. Here the subject details are displayed. The course model shows information about the type of course. Course-related videos are shown here. Users can take the quiz here.

Teacher Module: This module is used to manage the teacher's information. Teachers' information is shown to the user and give the LinkedIn link to the user.

Contact module: This module assists in obtaining questions for the user. Here the user needs to enter the required data into the field.

Tools and Technologies

i.   Hardware Technology

Monitor/Screen display	TFT Screen (1366*768)
Processor	I3 or higher processers
HDD	Minimum of 5GB
RAM	4GB

ii.   Software Technology

Language - Version	HTML, CSS, Java Script
OS	Windows
IDE	NetBeans

What the Students Say About Us?

Kavana
Java

Review:

I did Java Fundamental course with Shukla Sir. It was a great experience. The brain teasers and assignments, actually the whole lot of content was really good. Some problems were challenging yet interesting. Was explained very well where ever I stuck...

★★★★★

Krishna
C/C++

Review:

When I was watching "Dear Zindagi", I could relate Sharukh Khan to Arnav Bhaiya. The way Sharukh Khan was giving life lessons to Alia Bhatt, in the same way Arnav Bhaiya will give coding life lessons which will guide you throughout your code life...

★★★★★

Sandya
Python

Review:

This was my first complete course at coding blocks. I attended the Python course in Winter 2020 and loved it which made me join the full course. Harry bhaiya and Dhaval Bhaiya(TA) have good knowledge about the field and were very helpful in making us understand the concepts. I would certainly recommend this to anyone...

Limitations of existing system

There may be many software to serve E-learning services. These are very complex and requires skilled computer workers to handle it and they are not flexible to use.

And it tells the organization to whether this project is worth the time and resource put into it. And its profitable or not.

Future scope :

This project has a very vast scape in the future. This project can be implemented in organizations along with additional features.

- ➢ Increasing the accuracy of the model by training it with large number of datasets.
- ➢ Developing a standalone application for different platforms including all the features.
- ➢ Implementing resource efficient algorithms and methods to reduce the resource usage
- ➢ Developing a user friendly graphical Developing a user friendly graphical
